ESG Assurance

ESG assurance refers to the independent verification of a company's ESG reporting and performance, ensuring the accuracy, reliability, and transparency of disclosed data.

In the Indian context, assurance is becoming increasingly critical as companies adhere to frameworks like **BRSR** and meet the expectations of investors, regulators, and stakeholders. Independent assurance not only strengthens stakeholder trust but also mitigates risks related to **greenwashing** and non-compliance.

As businesses aim to align with global best practices such as **ISAE 3000** and **AA1000**, ESG assurance provides confidence that sustainability claims are credible, improving access to capital and enhancing reputation in domestic and international markets.

Our Offerings:

- BRSR Report
- GRI Report
- CSRD Assurance
- TCFD Assurance
- Supply Chain Audit & Assurance
- LCA Studies & Report
